## Ahead of the wave The new reality for shipping

### Douglas Lang

MD, Anglo Eastern (UK) Ltd

The fundamentals of ship operation have changed little for centuries but a transition has started and is accelerating. There are developments in areas of manufacturing, technology, operations and environmental concerns. Traditional boundaries are disappearing, manufacturers are moving further downstream, new transformative digital technology has the potential to enable industry wide re-modelling and all the while the “greening” process needs to accelerate. Douglas Lang will tell us where the new reality is heading.

Douglas Lang is Group Managing Director (offshore) of Anglo Eastern which offers vessel, crewing and technical consultancy management services. Douglas worked with Denholm, the well-known Glasgow ship management company prior to its merger with Anglo Eastern in 2001. He is a Naval Architect with experience that includes 10 years in research in offshore facilities.
