

IESIS
A MULTI-DISCIPLINARY
ENGINEERING INSTITUTION

The Art of Engineering - a personal view

Professor Dugald Cameron OBE

Director, Glasgow School of Art , 1991 to 1999

“Engineering is one of the great arts of humankind, for engineers combine art and science to satisfy the needs of humankind. Engineering sustains and enhances civilisation through what it creates by imagination and analysis.

This I will demonstrate through chosen examples from the first industrial revolution onwards.

It is not the depiction of engineering in art, dear though that is to me, but the actual products themselves, inspiring, wonderful and useful objects.”

Admission Free
Visitors Welcome
